

Letter of Recommendation

Oleg Sechovcov

I've worked closely with Oleg on several projects over the years, most recently Hell Dive.

Oleg is talented, hard-working, and takes direction and criticism with a positive attitude. If you let him he'll push back on decisions when he disagrees, personally those exchanges were some of the moments I enjoy most working with him.

He's a fast idea-generator, and his ideas actually fit or push the project forward rather than feeling like an add-on. He is strong at prototyping concepts and has also lately shown a keen eye for taking rough prototyping and turning it to release-ready designs.

I'd recommend him to any studio. He is young and can be a bit rough around the edges in his approach, but I have no doubt he'll only grow stronger as a game developer.

For any questions feel free to contact me.

Best regards
